Summary
A Web Developer capable of creating web applications with CRUD functionality possessing 3 years' professional experience. Skilled in Front-end and Server-side development gained through the workplace and applied school projects.

Technical Skills

- HTML / CSS / JavaScript (3 years)
- SASS (3 years)
- PHP (3 years)
- Laravel (1 year)

- Drupal 8-10 (3 years)
- React JS (4 months)
- NoSQL - MongoDB / Firebase (4 months)
- Git (3 years)

Relevant Work Experience

May 2021 – Present: Web Developer, VERB Interactive (Full -Time)
- Built and maintained Front-end components for over 19 different Drupal 8-10 websites.
  - Used Javascript and jQuery to add interactive functionality.
  - Used SASS/CSS to achieve layouts according to Figma responsive design specifications (mobile, tablet, laptop and desktop).
- Updated and wrote PHP in both Functional and Objected Oriented Programming paradigms.
  - Queried database to get, manipulate and feed data to front-end in the form of JSON and the Drupal render process.
  - Writing and refactoring functional coding patterns to improve readability and maintainability.
- Troubleshooting and problem-solving with Project Managers, QA and Design.
  - Made detailed comments for feature implementations on Jira for ease-of-use and testing for QA and Project Managers.
  - Provided screenshots / video recordings on Jira tickets to better explain and interpret requests from Project Managers.

Projects (Volunteer, Personal and School)

NSCC Chat (Jan 2021 – Apr 2021): A single-page application chat app clone, like Slack with CRUD and authentication functionality. Allows users to create an account, log in and chat with other users in groups or channels.

Technologies: Firebase, React JS, Bootstrap, Material-UI, Git

Nova Scotia Community College IT Job Fair Website (Sep 2020 – Mar 2021): A website serving as an advertisement for the annual NSCC IT Job Fair with CRUD functionality for registering students and businesses for the event.

Technologies: PHP, Laravel, MySQL, HTML, Bootstrap, JavaScript, Git
Link to Project: https://itjobfair.ca/

Battleship Browser-Based Game (Apr 2020 – May 2020): A browser-based, simplified clone of the once-popular video game, Battleship.

Technologies: Vanilla JavaScript, HTML, CSS
Link to Project: https://battleshipv1-kellychin.netlify.app/

Other Work Experience

Mar 2019 – June 2021: Staffing Coordinator, Carecor (Part-Time)
- Worked with a team of 7 staffing professionals to increase shift fill rates by 5% over 3 months, increasing revenues as a result.
- Filled an average of 500 shifts on a weekly basis (worth approximately $200,000 of company revenue) with the staffing and recruitment team.

Education

- **IT Web Programming, Nova Scotia Community College (Sep 2019– May 2021)**
- **Bachelor of Commerce, Saint Mary's University (Sep 2010– Jan 2015)**
