

Kelly Chin

Web Developer | Front-End | Content Management Systems

Edmonton, Alberta (Remote preferred)

kellyjchin@outlook.com | kellychin.netlify.app

Professional Summary

Accomplished Web Developer with 5 years' experience delivering high-impact solutions in both product and agency environments. Proficient in engineering lightweight, vanilla non-framework solutions, dynamic React applications, and custom Content Management Systems (CMS).

Technical Skills

Languages & Markup: JavaScript (ES6+), TypeScript, HTML5, CSS3, Sass / SCSS, CSHTML, Twig, C#, PHP

Frameworks & Libraries: React, jQuery, Symfony, .NET

Content Management Systems (CMS): Drupal, Directus, Wordpress

Developer Tools: Git/GitHub, Sitespect, Growthbook, Supabase (PostgreSQL)

Performance & Quality: Core Web Vitals (CWV), Web Accessibility

AI Tools: Github Copilot, ChatGPT

Professional Experience

Covers | Halifax, NS (Remote)

Front-End Developer | June 2024 – Present

- Engineered responsive web user interfaces using CSHTML, jQuery, JS and Sass/CSS3 within enterprise .NET and Directus CMS environments based on design mockups.
- Led continuous data-driven optimization, launching multiple concurrent A/B experiments via SiteSpect and GrowthBook that boosted user engagement and click-out rates by up to 50%+.
- Optimized Core Web Vitals with a focus on Cumulative Layout Shift (CLS), utilizing browser throttling and layout diagnostics to implement CSS fixes that achieved "Good" performance ratings.
- Completed company-sponsored courses on the O'Reilly platform to build practical skills in React and React Native development with Typescript.

VERB Interactive | Halifax, NS (Hybrid)

Web Developer | May 2021 – June 2024

- Developed, maintained, and enhanced nearly 20 client websites using Drupal 8–10, leveraging PHP, Twig, JavaScript, HTML5, and SCSS to deliver responsive and accessible user experiences.
- Enhanced accessibility of legacy components by refactoring a jQuery-based date picker to support keyboard navigation and screen reader compatibility.
- Led accessibility improvements across client projects by utilizing Axe DevTools and applying WCAG best practices, reducing accessibility issues and improving keyboard navigation and overall usability.
- Supported content management and site updates within Drupal and WordPress environments while providing ongoing maintenance and feature enhancements.
- Collaborated with designers, project managers, and cross-functional teams in an agency environment to deliver multiple concurrent projects on schedule and according to client specifications.

Projects

Derpy Pizzas | React, Supabase, PostgreSQL, React Router, Context API

derpypizzas-react-supabase.netlify.app/ | github.com/kellyjchin/derpypizzas-react-supabase

- Built a full-stack restaurant review and ordering application using React and Supabase, enabling users to create accounts, place mock orders, and interact with community-driven content.
- Implemented complete CRUD functionality for reviews, comments, and user orders, integrating Supabase Authentication (with React Context API) and PostgreSQL-backed data storage.
- Developed interactive features including review likes/dislikes, recent review feeds, paginated user dashboards, and responsive data tables for managing orders and reviews.
- Implemented client-side routing with React Router to deliver a seamless single-page application experience and intuitive navigation between reviews, orders, and account management features.

NSSC Chat | React, Firebase (Firestore, Authentication)

nssc-chat.web.app/signin

- Developed a real-time messaging application inspired by Slack using React and Firebase, enabling users to communicate across course-based channels.
- Implemented real-time message synchronization using Firestore listeners to deliver instant updates without page refreshes.
- Built authentication and user session management using Firebase Authentication to support secure login and persistent user sessions.
- Collaborated on a team-based capstone project, contributing to front-end architecture, feature development, and real-time data integration.

Education

IT Web Programming, Nova Scotia Community College (Sep 2019– May 2021) | Halifax, NS
